

## WALL PEDESTAL MOUNTS (LEFT SHOULDER ON WALL) EXPLAINED

A wall pedestal mount is a type of mount which is put up against a wall, with either left or right shoulder against the wall and head is facing away from the wall, into the room.

We have three standard available wall pedestal mount forms all differing in “head direction”. Head direction is determined by the direction the animal is looking. *Do not be confused by the direction you look when standing in front of the animal.*

1. ½ Right: Left shoulder on wall, looking  $\pm 45^\circ$  away from wall, into the room, *Some species might have an issue with horns touching the wall and will be adjusted accordingly*
2. Right: Left shoulder on wall, looking  $\pm 90^\circ$  away from wall, into the room,
3. Hard Right: Left shoulder on wall, looking  $\pm 135^\circ$  away from wall, into the room, *Some species might have an issue with horns touching the wall and will be adjusted accordingly*

## WALL PEDESTAL MOUNTS (RIGHT SHOULDER ON WALL) EXPLAINED

A wall pedestal mount is a type of mount which is put up against a wall, with either left or right shoulder against the wall and head is facing away from the wall, into the room.

We have three standard available wall pedestal mount forms all differing in “head direction”. Head direction is determined by the direction the animal is looking. *Do not be confused by the direction you look when standing in front of the animal.*

1. ½ Left: Right shoulder on wall, looking  $\pm 45^\circ$  away from wall, into the room, *Some species might have an issue with horns touching the wall and will be adjusted accordingly*
2. Left: Right shoulder on wall, looking  $\pm 90^\circ$  away from wall, into the room,
3. Hard Left: Right shoulder on wall, looking  $\pm 135^\circ$  away from wall, into the room, *Some species might have an issue with horns touching the wall and will be adjusted accordingly*
